EDERRA

PELLET HYDRO STOVE

Beauty and perfect harmony have always been among the important values of mankind. That is why we have created our new flagship model pellet hydro stove, which we have named EDERRA. In a small strip of land, between Spain and France, the Basque language has given us this sonorous word meaning "beautiful". Just like our stove - elegant and gorgeous with its full glass surface.

The model is available in a total of 5 power levels, which allows it to be integrated into heating installations of different capacities. It is made of modern and resistant materials, with the integration of the highest technologies that guarantee long life and simple operation.

MAIN FEATURES

- Automatic cleaning of the burning chamber
- Automatic combustion management
- Room temperature control via thermostat
- Overheating safety
- Work time programming, weekly chrono
- Easy mechanism for manual cleaning of the turbulators
- Presence of safeties for key components
- Factory reset of the product
- Easy to use touch screen
- Spacious ashtray compartment
- Optional separate room thermostat module

TEMPERED GLASS

EDERRA's clean and elegant design is achieved through the use of 8mm heat-tempered glass certified to the European standard EN 12150-1. The high level of tempering allows it to be both strong and safe in the event of breakage. In addition, the glass is completely resistant to the high temperatures that the stove can emit.
